EXPERIENCE

Software Engineer and Co-founder

Oct 2025 - Present

Donto

- Built and maintained Donto, a dental clinic management platform.
- Designed the backend architecture for both cloud and on-premise deployments.

Backend Developer

Oct 2025 - Jan 2026

IONIK

- Shipped new features for Emplorium, an AI-powered customer support platform.
- Migrated various legacy features to a new architecture.

Mobile Developer

Dec 2024 - Apr 2025

PhazeRo

- Developed features for Gov.om, a mobile application providing government services in Oman.
- Integrated a video-calling platform into Signbook's mobile application.

Mobile Developer Intern

Jun 2023 - Dec 2023

FlexFret

- Worked on a mobile app for freight transportation and management.
- Implemented CI/CD automation with GitLab CI for automated testing and deployment.

VOLUNTEER WORK

Open Source Contributor

Dec 2023 - Jan 2024

SerenityOS

- Optimized +5 GML-based GUI applications by porting them to a GML Compiler.
- Updated +10 out of date software ports.

Open Source Contributor

Mar 2022 - Jun 2023

HardenedBSD

- Fixed and maintained 50+ software ports for the HardenedBSD operating system.
- Tested and reported various bugs and issues with the Operating System.

SKILLS

Languages: C, C++, Dart, Go, HTML, CSS, JavaScript, TypeScript, x86/x86_64 Assembly.

Frameworks & Libraries: BLoC, Express.JS, Flutter, Gin, Google-Test.

APIs & Communication: REST APIs, GraphQL, gRPC.

Databases & Services: PostgreSQL, SQLite, Redis, DynamoDB, Firebase, Supabase.

Development & Infrastructure: Linux, Bash, Docker, CMake, Make, Git, QEMU, GDB, Valgrind, FFmpeg.

Compiler & Language Tooling: Lex, Yacc, Interpreters, Virtual Machines, Bytecode, Garbage Collection.

Engineering Practices: Agile/Scrum, Test-Driven Development (TDD), Clean Code, CI/CD, Automated Testing.

PROJECTS

MONOLITH | C, Makefile, QEMU, x86/x86_64 Assembly

[GitHub](#)

- A graphical operating system from scratch with a custom kernel, userspace, and desktop environment.
- Implemented preemptive multitasking, virtual memory, privilege separation, system calls and interrupt handling.

BlitzUI | C, Makefile, Software Rendering, OpenGL

[GitHub](#)

- A portable, fast and lightweight immediate mode GUI library.

HAL64 | C, Makefile

[GitHub](#)

- A stack-based virtual machine.
- Achieves 150-220% higher performance than python on basic benchmarks.

SPL | C++, CMake, Lex, Yacc

[GitHub](#)

- A statically typed, interpreted, VM-based and garbage collected programming language.
- Achieves approximately 20-150% better runtime performance than Python on certain benchmarked workloads.

Yasi | C++, CMake, Lex

[GitHub](#)

- A lisp-like interpreted programming language.

EDUCATION

Bachelor's of Science in Electronics Engineering

Sep 2025 - Present

University of Jijel

Jijel, Algeria

Bachelor of Science in Renewable Energies

Sep 2022 - Jun 2025

University of Science of Technology of Oran

Oran, Algeria
